

DIY PARADE FLOAT

Have you ever wanted to have a parade in your house or backyard? Here's your chance!
Create one by designing your own float with arts and crafts!

STEP 1:

Choose something to dedicate your float to. For motivation to make it look good, choose something you really care about. It can be anything from a Festival event to your favorite sport, food or whatever you want!

STEP 2:

Use materials you already have at home. For example, you can start with a shoebox, tissue box, a wagon or Legos!

STEP 3:

Build your float to your heart's desire and make more than one if you want!

STEP 4:

Take a picture or video of your parade and share it on social media, tagging @KyDerbyFestival and using #kyderbyfestival and #healthyathome.

Be sure to get the whole family involved to create many floats! You can even work together through video chat.
